

August 2025

Postdoctoral Opportunity

Process Simulation - Pharmaceuticals Production

PI Lab – Technion, Israel

The PI lab is welcoming applicants with excellent track record to join our team as Postdoctoral Scholars. The position is available immediately.

Research Focus

The postdoctoral scholar will join the PI Lab at Technion to investigate innovative pharmaceuticals manufacturing processes based on **Mechanochemistry**. The work will involve process simulation, optimization, techno-economic analysis (TEA), and life cycle assessment (LCA) of emerging synthesis pathways.

Candidate Profile

- PhD in Chemical Engineering (awarded within the last 3 years)
- Experience in Process Systems Engineering
- Expertise in simulation, optimization, and control of chemical processes
- Proficiency with tools such as Aspen, HYSYS, gPROMS, Proll

How to Apply

Send your CV, cover letter, and contact details for 2–3 references to:

Email: michael@technion.ac.il
